INTERNSHIP PROCESS

Week 3 — Cart & Apple HIG

Cart page design, order summaries, and Apple Human Interface Guidelines.

- The exported files from Figma (PDF and PNG) were too large, so I compressed them using Canva's compressor before uploading.
- It took me some time to understand Apple Human Interface Guidelines (HIG) and how to apply its principles effectively in UI design.
- I learned how to design a cart page that clearly displays a complete order summary, including line items, taxes, shipping charges, discounts, and out-of-stock alerts. I also explored how tax calculations and discount redemption are presented within the cart.
- I realized that the cart and checkout flow involve multiple steps based on the user's needs, and each step plays an important role in ensuring a smooth purchasing experience.
