

INTERNSHIP PROCESS

8-week design journey

A week-by-week record of teardowns, flows, tokens, prototypes, and the case study — the working documents behind the checkout redesign, kept in their original folders.

0

Week 0

Week 0 — Design Glossary

Key UX terms defined at the start of the internship. →

1

Week 1

Week 1 — Teardowns

Heuristic teardowns of e-commerce screens and components. →

2

Week 2

Week 2 — User Flows & Pricing

Happy-path journey, error recovery branches, and e-commerce pricing.

3

Week 3

Week 3 — Cart & Apple HIG

Cart page design, order summaries, and Apple Human Interface Guidelines.

4

Week 4

Week 4 — Design Tokens & Components

Building a tokens.json, color palette, text-field and button components.

5

Week 5

Week 5 — Screen Iterations & WCAG

Per-screen UX changes, component fixes, and a WCAG 2.2 AA contrast audit.

Week 5 — WCAG 2.2 AA Contrast Audit

Contrast ratios and intended keyboard

tab order for the
checkout screens.

6

Week 6

Week 6 — Prototype & Constraints

Interactive component
variants, branching flows,
and Figma's limitations.

7

Week 7

Week 7 — A/B Test Proposal

Guest checkout visibility
hypothesis, control/variant,
metrics, and risks.

Week 7 — Contrast Re-check

Post-fix WCAG 2.2 AA contrast
validation on updated elements.

Week 7 — Final Screens & Testing

High-fidelity final screens,
usability findings, and an
A/B test proposal.

8

Week 8

Week 8 — Capstone & Portfolio

Shipping the case study,
design system site, and
design-process
documentation.
