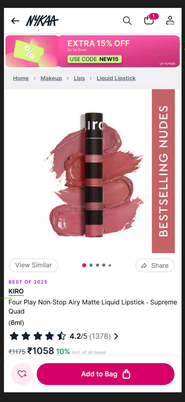
# NYKAA

**2** Issue #1
Cluttered Layout
Heuristic: Aesthetic and Minimalist Design
Impact: Important content becomes difficult to find.
Recommendation: Prioritize key labels and reduce unnecessary visual elements.

**1** Issue #1
Missing voice and visual search
Heuristic: Flexibility and Efficiency of Use
Impact: Users who have a product image but don't know its name must manually search, increasing effort and search time.
Recommendation: Add voice and visual search functionality for faster product discovery.

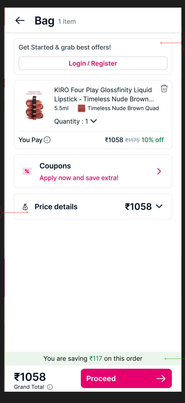
**3** Good Practice
The promotional banner clearly highlights the main offer with concise text.
Heuristic: Recognition rather than recall.
Impact: Users can quickly understand ongoing offers.

**4** Good Practice
Clear bottom navigation with labels
Heuristic: Match between the system and real world.
Impact: Users can easily understand and navigate between selection.



**1** Good Practice
The promotional banner clearly highlights the main offer with concise text.
Heuristic: Recognition rather than recall.
Impact: Users can quickly understand ongoing offers.

**2** Good Practice
Products are highlighted with labels such as "Best Seller"
Heuristic: Recognition Rather Than Recall
Impact: Helps users quickly identify popular and trusted products.

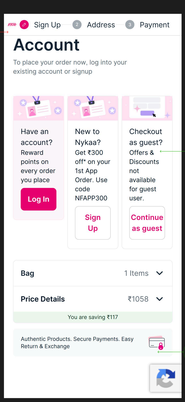


**1** Issue #1
Mandatory account creation
Heuristic: User control and freedom
Impact: User leave without purchasing the item
Recommendation: Provide a visible Continue as Guest option to allow user to complete their purchase

**2** Issue #1
Hidden Charges
Heuristic: Sticky Totals
Impact: Unexpected costs may reduce user trust and cause users to abandon their purchase.
Recommendation: Display all charges in single step.

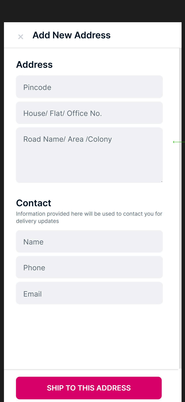
**3** Good Practice
The amount saved through discounts and promotions.
Heuristic: Visibility of System Status
Impact: Users can immediately understand the value of the discount, increasing confidence in their purchase.

**1** Issue #1
Placed too close together with little or no spacing.
Heuristic: Aesthetic and Minimalist Design
Impact: Creates visual clutter and increases the likelihood of accidental clicks.
Recommendation: Creates a cleaner interface and improves content discoverability.



**2** Good Practice
Match between system and the real world
Heuristic: Flexibility and Efficiency of Use
Impact: Users can choose their preferred login method.

**3** Good Practice
Trust and realibility
Heuristic: User control and freedom
Impact: Help users recognize, diagnose, and recover from errors



**1** Good Practice
Form fields are arranged in one vertical column.
Heuristic: Single-Column Form
Impact: Easier to scan and fill, especially on mobile.

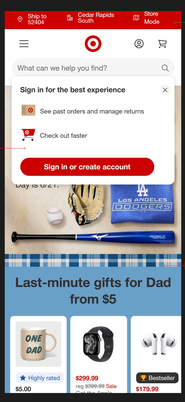
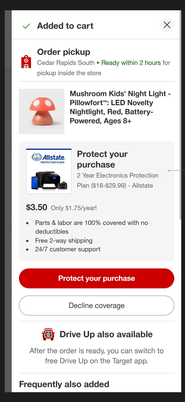
# TARGET



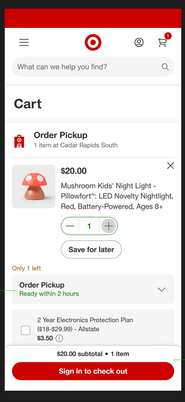
1 Good Practice
Trust and realibility
Heuristic: Recognition rather than recall.
Impact: Help users recognize, diagnose, and recover from errors

2 Issue #1
Mandatory account creation
Heuristic: User control and freedom
Impact: User leave without purchasing the item
Recommendation: Provide a visible Continue as Guest option to allow user to complete their purchase

2 Issue #1
A large banner occupies most of the first screen.
Heuristic: Aesthetic and Minimalist Design.
Impact: Users must scroll before seeing products or key content.
Recommendation: Prioritize key labels and reduce unnecessary visual elements.

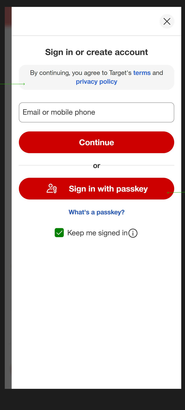


1 Good Practice
The checkout flow clearly presents an optional product protection plan with pricing and coverage details.
Heuristic: Match Between System and Real World
Impact: Users can make informed decisions about additional product protection before purchase.



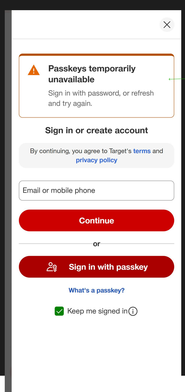
Good Practice
The platform clearly communicates that orders can be picked up within an hours.
Heuristic: Visibility of System Status
Impact: Provides a fast fulfillment option.

1 Good Practice
Order total stays visible while scrolling.
Heuristic: Sticky Totals
Impact: Users always know how much they will pay.

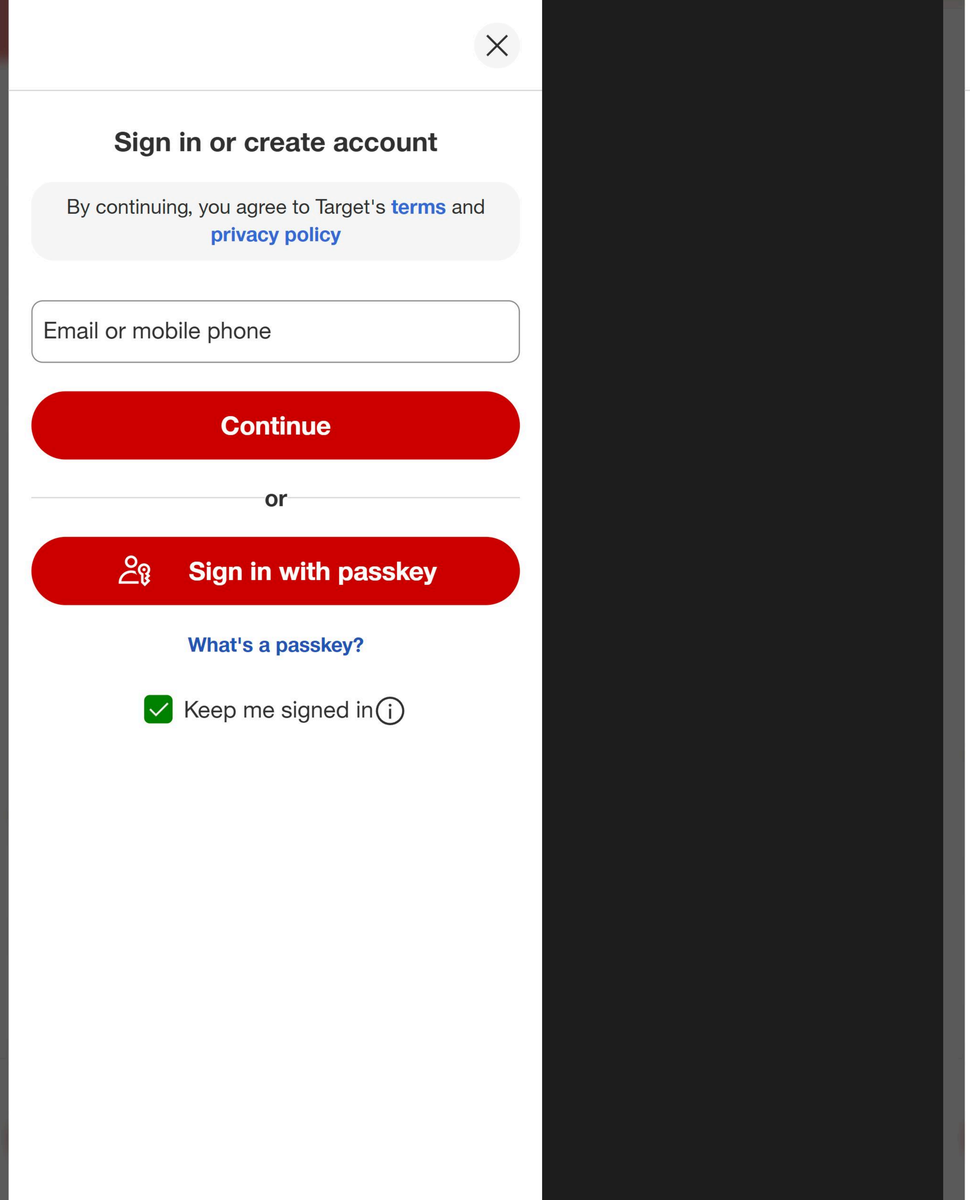


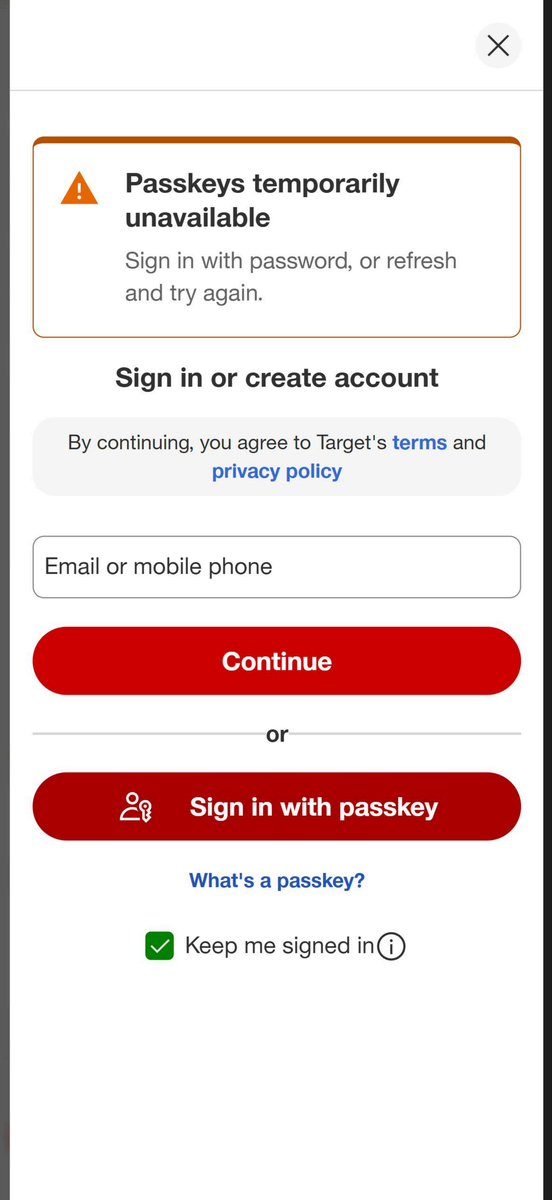
1 Good Practice
Lets users control how their data is collected and used
Heuristic: User Control and Freedom
Impact: Users feel more in control of their personal information.

2 Good Practice
Website supports passkey authentication.
Heuristic: Recognition Rather Than Recall
Impact: Users can sign in quickly without remembering passwords.



1 Good Practice
The system clearly informs users that passkey authentication is temporarily unavailable.
Heuristic: Visibility of System Status
Impact: Users understand what happened and can continue signing in without confusion.





Site provide passkey authentication instead the guest login for a user so they dont need to recall password.
